Bronze Badge

- object detection project is build up by using machine learning and python , dataset is given by the company.

RESEARCH PAPERS

PATTERN RECOGNITION IN DATA MINING

Patterns are recognised from the data of the laboratory. dataset collected from the kaggle. This is important and very helpful for the further predictions.

SUPERVISED MACHINE LEARNING ALGORITHM

classification and regression these two algorithms are used and implemented on the dataset for the analysis

UNSUPERVISED MACHINE LEARNING ALGORITHM

K-Means clustering algorithm is used for the segmentation of customers according to their requirements.

SPEECH-PY FOR SPEECH RECOGNITION

PROJECTS

CUSTOMER SEGMENTATION (10/2021 - 02/2022)

- It is about segmenting the customers for company growth. k-mean algorithm is used and the data set is collected from the kaggle. Customer segmentation is basically important for the growth of company.

REAL TIME SPEECH TRANSLATION IN MULTIPLE LANGUAGES (01/2022 - 06/2022)

- Translate the speech in real time in multiple languages. Record the voice in real time and translate it into multiple languages after that analyse the recorded audio files by applying algorithm RNN LSTM
